## Bespoke furniture, designed for your every need

It doesn't matter how great a design looks if it doesn't work in the real world. At Claughtons we pride ourselves on providing practical, long lasting solutions with a flair for design and eye for detail. All our furniture is custom manufactured in-house from high quality materials so it will stand up to the hostile environment of a busy office!

We will assist you to turn your ideas into reality, working closely with you to create a stylish, clutter free working environment.

## The no-clutter solution

The paperless office is still far from a reality so to help keep your office space tidy we can design and manufacture a range of storage solutions for all your documents. Whether they are plans, portfolios, maps, lever arch files, box files, scale drawings or standard A4 sized files, we can provide storage solutions to accommodate them.

Most offices also have other storage issues; where do you store your paper for the photocopier, your product catalogues and the Christmas decorations? Need a space to store the tools you use on site somewhere? What about the video conferencing equipment and reference books?

Let us know what you need to store and we can create a no-clutter environment for you that will make you proud of your office space.

## The ideal working environment

A well designed, tidy, orderly office environment will impress your clients and engender a sense of ownership from your staff, which will boost productivity and help you to comply with the relevant Health and Safety regulations.

*Have a look around your office. Would it benefit from a makeover by Claughtons? Call us today!*
